

Ref. No. SRPCE/2024-25/176

Date: -7/6/2024

The Green Campus Policy aims to promote environmental sustainability, efficient resource utilization, energy conservation, waste management, and environmental awareness among students, faculty, and staff. The policy is aligned with NAAC Criterion-VII (Institutional Values and Best Practices) and relevant AICTE norms related to environmental protection and sustainable development.

### Green Campus Policy – Objectives

#### 1. Environmental Sustainability

To protect the environment by reducing pollution, conserving biodiversity, and minimizing the ecological footprint of the campus through eco-friendly practices.

#### 2. Efficient Resource Utilization

To promote optimal use of energy, water, and other natural resources by adopting conservation measures and sustainable management practices.

#### 3. Energy Conservation and Renewable Energy

To reduce dependence on conventional energy sources by encouraging energy efficiency and the use of renewable energy such as solar power.

#### 4. Waste Management and Pollution Control

To minimize waste generation through segregation, recycling, and safe disposal while promoting the principles of Reduce, Reuse, and Recycle.

#### 5. Awareness, Participation, and Continuous Improvement

To create environmental awareness among students and staff, encourage active participation in green initiatives, and continuously improve sustainability practices in compliance with environmental norms.

The institution is committed to regular monitoring, review, and continuous improvement of green initiatives to ensure compliance with statutory and regulatory requirements.
